EDUCATION

University of North Carolina at Charlotte | Charlotte, NC

August 2022 - May 2026

B.S. in Computer Science, Concentration in Software, Systems, and Networks

Relevant Coursework: Database Design & Implementation, Engineering Probability and Statistics, Software Engineering, Introduction to Business & Professional Development, Operating Systems and Networking, Data Structures and Algorithms

Languages and Tools: Java, Python, SQL, JavaScript, HTML, CSS, C, C#, Git, AWS, Jira

Certifications: AWS Certified Cloud Practitioner, Microsoft Enterprise Product Management Fundamentals, Cisco Introduction to Cyber Security

RELEVANT EXPERIENCE

UNC-Charlotte OneIT Enterprise Infrastructure | Charlotte, NC

May 2025 - May 2026

Associate Network Technician

- Resolved daily end-user and infrastructure service tickets using the campus ticketing system, documenting work performed, escalating complex issues to senior technicians, and tracking requests through completion
- Deployed, maintained, and troubleshoot campus network infrastructure across multiple locations, including UPS systems, port activations, sensors, WiFi heat mapping surveys, and data closet audits
- Assisted senior technicians with network device configuration and server-side port activation to support reliable connectivity for campus users and departments
- Inspected and maintained data closets to verify security, organization, and compliance with internal infrastructure standards

The Office Craft Bar & Grill | Ballantyne, NC

March 2024 - May 2025

Food Runner

- Supported front-of-house operations, specifically working expo and food running
- Resolved customer concerns with any food or on-site issues with professionalism and urgency while communicating with back of house cooks in English and Spanish to expedite orders

PROJECTS

Solana Wallet Tracker | Personal Project

June 2026

- Built a Python and SQL project that fetches, parses, and stores Solana blockchain transaction data from a REST API into a structured SQLite database
- Designed relational database queries to generate summary reports on transaction volume, fee totals, token activity, and swap details, allowing data-driven review of wallet activity and trends
- Organized raw API data into usable reporting outputs, strengthening analytical, process documentation, and database management skills

PickFix | Senior Capstone

January 2026 - May 2026

- Led project management for a full stack cloud-based ticketing system by taking initiative on weekly meetings, communicating requirements to all team members, creating tickets along with user stories, and mapping out sprints
- Delivered the final project presentation and live demo to classmates and professors by explaining key features, technical implementation, and business use cases
- Contributed to QA testing and AWS feature implementation – Lambda, EC2, S3, CloudFront, Relational Database

LEADERSHIP EXPERIENCE

UNC Charlotte Men's Volleyball Club | Charlotte, NC

May 2022 - May 2026

Team Captain / President

- Managed semester budgets of up to \$10,000 while coordinating annual equipment orders based on player projections, procurement needs, compliance requirements, event logistics, and campus partnerships
- Delegated responsibilities across 8 officers, led weekly planning presentations, and supported cross-functional initiatives including a 175+ attendee arena event and recurring sustainability projects
